SUBJECT INDEX

Acoustic neuromas, Audiological findings in 125 cases of	353
Acoustic neuromas, Intermedius nerve involvement and testing in	276
Auditory meatus and the cerebello-pontine angle, An extended approach through the middle cranial fossa to the internal	410
Bands in the cat, Normal critical	245
Carcinoma, The relationship between the nuclear DNA content in smears of aspirates and the prognosis of mucoepidermoid	429
Carcinomas of the oral cavity and larynx, Increased lymphocyte ATP-ase activity in patients with	459
Cochlea, Noise and the RNA synthesis of the	230
Cochlear damage resulting from kanamycin and furosemide	86
Cochlear innervation in the guinea pig. I. The inner spiral bundle region	220
Cochlear innervation in the guinea pig. II. The spiral tunnel bundle	335
Cortical evoked potentials recorded from the guinea pig without averaging	7
Ear surgery, The use of the drill in	81
ENG tracings, An interactive program for the analysis of	120
ENT drugs, Local tissue effects of surface-applied	128
Epithelien, Melanocyten, Langerhanssche und Merckelsche Zellen in oralen ERA-Kennlinien bei normalhörenden Personen	294
Evoked responses from inferior colliculus as an index of hearing thresholds in guinea pigs	238
Evoked response, study of the first-order difference tone in man, An	1
Geniculate body, Inhibitory processes in the medial	323
Geniculate ganglion, Surgical anatomy of the	116
Goblet cells in the developing human nose	434
Inner ear, A modified "soft surface specimen technique" for examination of the	362
Inner ear damage and hearing loss after exposure to tones of high intensity	343
Laryngeal papillomas, Ultrastructural features of human juvenile	137

Lesions, Speech discrimination in quiet and in white noise by patients with peripheral and central	375
Maxillary antrum, Recent advances in microsurgery of the	161
Maxillary ostium in relation to body posture, The patency of the	443
Melanomas of the head and neck, Mucosal malignant	452
Middle ear and its lymphatic system, Macromolecular transport by the	19
Neck dissection, The problem of unilateral and bilateral	317
Nystagmus, Optokinetic, after cerebellar uvulonodectomy in squirrel monkeys	180
Nystagmus phase II in man, The effect of gravity on positional alcohol	214
Olfactory neuroblastoma	447
Otitis media, Acute	399
Otolithic maculae of the lamprey, An electron microscopic study of the	43
Otolithic membranes and middle ear ossicles of the gerbil, Incorporation of radioactive calcium into	269
Otosclerotic foci in the stapes, Active	255
Ototoxicity of topically applied gentamicin using a statistical analysis of electrophysiological measurement	389
Parotid gland U.N.S., Hyperplasia of the	155
Perilympe nach Schallbelastung, Proteinkonzentration der Meerschweinchen-	32
Potentials, Biasing of the summing	13
Reissner-Membran in gefriergebrochenen Präparaten, Verbindungskomplexe an Zellen der	38
Semicircular canals in man, Planar relationships of the	185
Semicircular canals in the guinea pig, The orientation of the	197
Sensorineural hearing (MB Meniere), Immediate restoration of basal, using a pressure chamber	93
Sisi test and adaptation, Part II	67
Sisi test and adaptation, Part III	74
Speech audiometry in children with normal hearing, Undistorted and filtered	383
Stapedius muscle reflex, Modifications of the, under spontaneous and experimental brain-stem impairment	61
Stapes fixation, Congenital, symphalangism and syndactylia	394
Stria vascularis, Analysis of curves Na-24 efflux from membrane labyrinth containing	111
Stria vascularis, Damage to the, in the guinea pig by acute atoxyl intoxication	167
Thyroplasty type I for dysphonia due to vocal cord paralysis or atrophy	465
Tonsil, Immunological function of human	474
Tracheostomy, Survival after haemorrhage from the brachiocephalic truncus following	312
Tympanic membranes and ossicles, Biological considerations for the use of homograft	283
Tympanometry with regard to the probe tone frequency, Methodologic observations on	54
Vestibular nerve stimulation in the cat, Effects of cholinergic agonists and antagonists on nucleu vestibularis lateralis unit discharge to	422
Vestibular neurons in the cat, Firing mechanisms in the single	415
Vestibular neurons, Responses of peripheral, to angular and linear accelerations in the squirrel monkey	101
Vestibular nuclei units in the rat, Influence of the hypothalamic stimulation on	206
Vocal cord paralysis, Experimental studies on the treatment of unilateral	150
